This means that Zuckerberg controls most users who talk to their cell phones, although it is true that many of them will have both applications installed on their devices. Optimized for devices with 2G connections. Is that right, verses for iOS? Occupies less storage space (less than 10 MB). Your developers are clear: it is light: it weighs less than 0.1 MB; has a simple and modern design: There are only what you need an application ā © eoOpen Sourceā E. The code of this application is In GitHub, you can check the authenticity of the application and contribute to your development. For them, in Memo Park, they designed Messenger Lite, or what is the same, the light version of Facebook Messenger. On the one hand, Facebook for the social network and, on the other, Facebook Messenger to talk to our contacts. Maki does not only solve this problem, already allows both, but works much better, more private and with More features than the official application and all this in a totally free way.Pheenixphoenix is another of these alternatives to facebook that does not only allow us to save battery, storage and data from our smartphone, but also works much better than the OFFICAL APPLICATION. Also, Phoenix is also 2 in 1, because you do not need to install Messenger separately. Try it, worth it.
